no.	Risk	Mitigation Plan
1	In case of sickness, he/she cannot join meeting.	Take care as long as he/she can for keeping health body.
2	Because of too many members, it is hard to find right place and time to meet.	Make an arrangement for meeting as soon as we can.
3	Each member has his/her different experience of development, sometimes it occurs misunderstanding of communication or developing our service's quality.	Try to communicate enough with each other and unify team's knowledge. Also, he/she should study that he/she doesn't know much on his/her own.
4	As a period of development is quite short, it is difficult to finish on time within high specs.	We have to minimize additional functions due to the short period. Or we should request to make the period longer and get a confirmation.
5	There is a possibility of designer's out of contact because of high overhead.	Distribute designer's work to reduce his burden.
